

Amritraj Lamba

lamba.amritraj@gmail.com | +91 8860470606

Heritage International Xperiential School, Gurugram.

EDUCATION

AUGUST 2024 - MAY 2026

IB Diploma (Grade 11 and Grade 12)

- Relevant Coursework: HL Math Analysis and Approaches, HL Chemistry, HL Physics, SL Economics, SL French B, SL English A Language and Literature

JUL 2023 - JUN 2024

IGCSE (Grade 10)

- 10/10 A*s
- School Topper in *Additional Mathematics*, School Topper in *Chemistry*

Standardized Test Scores:

- **SAT** – 1550 (Maths 800, Reading & Writing 750)
- **AP** – Calculus BC: 5/5
- **IELTS** – Band 8

LEADERSHIP

Founder, Sewage Suraksha (April 2024 - Present)

- Developed a sewage lid with multi-gas sensors; it is a low-cost retrofit ensuring safety of municipal workers.
- The lid detects harmful gases, including H_2S , CH_4 , NH_3 , & CO , and alerts authorities to hazardous gas levels.
- Tested on 17 sewers and cleared by the National Disaster Management Authority for adoption.

Founder, Flood Shield (July 2024 - Present)

- Flood detection IoT for real-time cloud mapping and emergency coordination; Special Praise for 'practicality' at the Princetonian.
- Adopted by the National Disaster Management Authority.
- Designed and piloted an affordable early warning system for floods that alerts authorities to areas where flooding occurs.
- Adopted by 1000+ houses and commended by the Haryana Government.
- Also received the Crest Gold Award for this invention.

Leader — Ingenix School STEM Society (October 2024 - October 2025)

- Revived and expanded society from 20 to 50+ members.
- Mentored teams for the Cambridge Science Competition & F1 in Schools, helped them qualify for nationals.

Leader — FUNCTION, After School Robotics Club (October 2024 - October 2025)

- Founded a 20+ member club teaching CAD, programming, and mechanical design outside of competition teams.
- Introduced collaborative engineering workshops (bridge/tower builds, quizzes) to strengthen teamwork and experimentation.
- Built a hands-on learning culture that became an entry pathway for beginners; several members progressed to competitive robotics.

RESEARCH

Automation & Robot Adoption in Delhi-NCR Factories, Author (January 2025 - September 2025)

- Analysed five factories from fully manual (e.g., Metaval Engineering) to highly automated (e.g., Kadence Automation) to assess efficiency, training needs, and scalability.
- Found robot-assisted systems improved efficiency by up to 20% while reducing fatigue and errors.
- Highlighted the need for retraining, ergonomic design, and phased adoption.
- Developed a roadmap for SME modernisation without worker displacement; validated through Delhi-NCR field data, mentorship from [Stanford University Prof. Dr. Arvind Karunakaran](#), and publication in Lex Localis.

Coral Reefs as Natural Barriers to Coastal Erosion in India, Author (March 2024 - August 2025)

- Used satellite imagery and GIS to show shorelines protected by healthy reefs had less than half the erosion of areas with degraded reefs.
- Provided evidence to integrate reef restoration into climate adaptation strategies for cities like Mumbai and Chennai, complementing engineered defenses.
- Recognition included publication in the International Journal of Environmental Sciences and mentorship from [Prof. Dr. Umang Soni](#), with validation in competitive research platforms.

SUMMER PROGRAMS

University of Pennsylvania, Wharton Global Youth Program (June 2025)

Product Design Academy

- Collaborated with [Professor Taylor Caputo](#) and international peers under the Wharton faculty, learning design thinking, prototyping, and TAM/SAM/SOM analysis.
- Learned to apply structured market-sizing frameworks to test creative engineering ideas against commercial viability.
- Prototypes developed during the program reflected this rigorous approach, and faculty feedback validated the professional grounding in product innovation.

LaunchX, Online Bootcamp (June 2025)

- Selected for LaunchX; collaborated with peers to ideate, prototype, and pitch ventures.
- Gained hands-on experience in market validation, business modelling, and product design.

Euler's Circle (June - July 2024)

- "Serious Mathematics for Serious High School Students" under Stanford University Prof. Simon Salzedo.
- One of 30 members worldwide.
- Capstone on linear algebra and projective geometry; improved modeling intuition later applied to CFD and robot mechanisms.
- Attended on 50% scholarship.

INTERNSHIPS

Summer Intern, Vardan Envirolabs, Gurugram (December 2024 - February 2025)

- Worked in an EIA consultancy, performing lab tests on air and water samples and learning to operate professional instruments like spectrophotometers and gas analyzers.
- Gained practical understanding of how data translates into impact-assessment reports that influence project approvals.
- Used the knowledge from this experience to begin working on the sewage-detection lid project.
- Received a certificate and recommendation letter from the lab director, validating both the internship and the project.

ADVANCED COURSES

Art of Problem Solving (AoPS)

- Completed all introductory & intermediate courses on Algebra, Number Theory, Geometry, and Counting & Probability.

World International Mathematics Olympiad Training Course (January 2024)

- Professional Mathematical Olympiad training provided by Olympiad Champion Education Group at University of Malaya, Kuala Lumpur, Malaysia.

ACADEMIC HONOURS AND AWARDS

MATHEMATICS

USA Math Olympiads (2022–24)

- AMC 12B (2024): Scored 132/150
- School Rank 1, Country Rank 28, Qualified for AIME, Certificate of Distinction, Honour Roll (Top 2.5%)

World International Mathematics Olympiad (WIMO), Final, January 2024 (Kuala Lumpur, Malaysia)

- Bronze Award

CEMC (University of Waterloo)

- Pascal Contest (9th Grade, 2023): 2nd Place from India region, Certificate of Distinction, Student Honour Roll
- Fryer Contest (9th Grade, 2023): 2nd Place from India region, Certificate of Distinction
- Cayley Contest (10th Grade, 2024): Certificate of Distinction, Student Honour Roll
- Galois Contest (10th Grade, 2024): Certificate of Distinction
- Fermat Contest (11th Grade, 2025): 9th Place from India region, Certificate of Distinction, Student Honour Roll
- Hypatia Contest (11th Grade, 2025): Certificate of Distinction

SIMOC (Singapore International Mathematical Olympiad Challenge), Singapore, July 2024

- Maths Olympiad Contest: Silver Award
- Maths Warrior Challenge: Silver Award
- Mind Sports Challenge: Bronze Award

IOQM (Indian Olympiad Qualifier in Mathematics) 2024–25

- Certificate of Merit

SASMO (Singapore and Asian School Mathematics Olympiad) 2024 (Grade 10)

- Gold Award

AMO (American Mathematics Olympiad)

- Gold Award (2023, Grade 10)
- Gold Award (2022, Grade 9)

TIMO (Thailand International Mathematical Olympiad) Final Round 2022–23

- Gold Award (Secondary 3 Group)

HKIMO (Hong Kong International Mathematical Olympiad)

- Heat Round 2024: Gold Award (Senior Secondary Group)
- Final Round 2022: Gold Award (Secondary 2 Group)

Stanford Math Tournament (SMT) 2023

- Honourable Mention in General Test
- Australian Mathematics Competition 202
- Certificate of Distinction (Senior Division, Grade 11)

International Maths Kangaroo Competition (2023)

- Silver Medal

International Junior Honor Society (IJHS), Singapore (2023/2024)

- Certificate of Membership

CHEMISTRY

Avogadro Chemistry Contest (University of Waterloo) (11th Grade, 2025)

- Certificate of Distinction

PHYSICS

Sir Isaac Newton Physics Contest (University of Waterloo) (11th Grade, 2025)

- Certificate of Distinction

Future Intelligence Science Olympiad Physics, International Round (2024)

- Gold Medal

ROBOTICS

First Tech Challenge (FTC), February–July 2024

- Role: CAD and Design Head of Team, Game Player
- Achievements: Qualified for Asian Pacific Open Championship (APOC), Sydney, Australia
- Won: Inspire Award (2nd Place) and Think Award 2024, 4th Ranked in Knockout Races out of 32 teams.

STEM

F1 in Schools 2022- 2024

- Role: Design Engineer
- Ranked 15th in Nationals
- Regional Digital Marketing Award

SOCIAL IMPACT PROJECTS

Teens of God (Regd. Local NGO) (Aug 2022 - Dec 2023)

- Mentor/Tutor teaching basic Math and Science concepts to underprivileged children.
- One of the lead members of the NGO's robotics branch, where we taught concepts of robotics and circuits using donated STEM kits.

Signal Stars (FTC Outreach Initiative, Thane) (Jan 2024 – Jul 2024)

- Volunteered as a mentor for the Signal Stars team from a rural-area community in Thane.
- Led rural students through design, construction and competition preparation, culminating in the team earning the Judges' Choice Award at the FIRST Tech Challenge India Championship 2023-24
- Guided the students to present a strong engineering portfolio, build a modular robot mechanism and collaborate effectively under competition constraints.

SKILLS

- Technical Skills/Tools: Python, 3D Modelling (CAD), Arduino, Robotics.
- Sports: Diploma & Black Belt in Shotokan Karate.
- Music: Guitar (Trinity Rock & Pop Grade 5).
- Languages: English, Hindi, French, Punjabi.

MEMBERSHIP**New York Academy of Sciences – The Junior Academy Member**

- Selected member; engaged for a year with the Academy's STEM community.
- Part of the Solar Power team under Energy Infrastructure.
